## Late Invertebrates Crossword

### Across

25. insects possess \_\_\_\_\_ eyes which allow them to see a wide field of view
27. the muscular part of the basic body plan of a mollusk
28. the numbers of pairs of legs on insects
31. the cloak-like part of the body found in Mollusks
32. the number of pairs of legs on spiders and scorpions
33. Arthropods must do this to their exoskeleton in order to grow
34. all Arthropods possess these anterior structures except for the sub-phylum containing spiders and scorpions
35. the region of a mollusk which contains the internal organs
36. many Cephalopods will use this substance as a defense mechanism in order to escape predators
37. the class of phylum Mollusca which includes clams, mussels, and oysters
38. the type of circulatory system is not always in vessels but will pool in regions called sinuses
39. the class of phylum Mollusca which includes snails and slugs
22. the type of symmetry displayed by Arthropods and Mollusks
23. the specialized respiratory organs found in spiders and their relatives
24. the phylum which includes sea stars and sea urchins
26. when a sea star loses a ray, it can regrow it using the process of \_\_\_\_\_
29. millipedes eat only plants and are therefore referred to as \_\_\_\_\_
30. the phylum which includes snails, clams, and squid

### Down

2. the class of phylum mollusca which includes octopi and squid
3. the substance which make up the exoskeleton of arthropods
4. a circulatory system where blood is always contained in vessels
5. almost all molluscs have this hard outer covering
6. tubes running through the bodies of insects which aid in respiration
11. the structures found on sea stars which allow them to move and grip prey
13. the structures used by squid for respiration
14. a fusing of the anterior two segments of some Arthropods results in a structure called the \_\_\_\_\_
15. the phylum which includes organisms with exoskeletons
16. openings found on the bodies of insects which lead to a network of tubes used for respiration
17. a skeleton on the outside of the body
19. a skeleton on the inside of the body
